Webscale Stratus

World-class Cloud Delivery and Management
for Small to Mid-sized Ecommerce Businesses

Merchants still with a traditional hosting provider for their storefronts, are likely plagued by challenges like slow page performance, unplanned downtime, security vulnerabilities, and poor support. Addressing these issues takes a merchant's focus and time away from running their business.

While the needs around availability, performance, security, and support are not entirely different for any ecommerce merchant, small and medium-sized businesses (SMB) and hyper-scale startups may not be able to afford enterprise-grade solutions or be able to hire world-class cloud engineers.

Webscale Stratus levels the playing field.

**Perfect for small
and medium-sized
businesses**

Built-in the cloud, with rock-solid security and compliance, high performance and availability, and 24x7 support from ecommerce experts, Webscale Stratus delivers an enterprise-grade platform, designed by developers, for developers, that can be purchased through a simple self-service website, in a matter of seconds. With pricing starting at less than \$100/mo, Webscale Stratus delivers powerful cloud management and hosting plans for merchants and developers with even the tightest budgets.

Free Migration

Moving to Webscale Stratus, from any hosting provider or on-premise infrastructure, is hassle-free as merchants get to experience the white-glove services of Webscale's migration engineers without incurring any cost whatsoever. Webscale's automation and DevSecOps protocols ensure the world's simplest and fastest cloud migration, zero-downtime containerized code deployments/upgrades, and seamless ongoing management. Webscale's auto-provisioning systems prevent human errors common with more manual, traditional hosting providers, and applications are always blueprinted for easy rollback if needed.

Webscale Stratus Plans and Pricing

Webscale Stratus goes far beyond traditional hosting by layering SaaS/software for availability, security, and performance over cloud instances within a distributed global network.

| Name of Plan | Visitors/Month (Minimum) | Visitors/Month (Maximum) | Price/Month |
|---------------------------------|--------------------------|--------------------------|-------------|
| Webscale Stratus Starter | 0 | 2,500 | \$98.00 |

Cloud Delivery

Ecommerce Platform

Cloud Regions

Key Features

PCI, SOC2 and HIPAA Compliance

Webscale Stratus is audited and certified for PCI Level 1, SOC 2 Type II and HIPAA compliance, ensuring absolute peace of mind for merchants that their customers' data is safe.

Optimized Exclusively for Ecommerce

Webscale Stratus has been custom-built for ecommerce. The technology stack has been aggressively optimized with mastery over indexing, caching tweaks, and theme features unique to Magento, WordPress and other LAMP stack-based ecommerce platforms.

PWA Support

Leveraging any leading PWA developer tools, merchants can quickly build high-performance PWAs on top of Webscale Stratus and increase user engagement and conversion rates.

High Availability

With Webscale Stratus, merchants enjoy high availability through proactive monitoring and real-time alerts, ensuring orders get saved and checkouts never fail.

Rock-solid Security

Webscale Stratus' Web Application Firewall and Malware Scanner ensure rock-solid security from malicious hackers.

Auto-scaling Infrastructure

Ecommerce storefronts on Webscale Stratus can easily manage any spike in traffic with no change in page performance, thanks to its unlimited, and automated horizontal and vertical auto-scaling.

User-friendly Admin Tools

The Webscale Stratus control panel offers merchants and developers easy access to manage users, SSL certificates, cron jobs, service configurations, logs, advanced metrics, and more.

24x7 Support

Round-the-clock support by a team of certified ecommerce and multi-cloud experts that have migrated and currently manage thousands of online storefronts with 15-minute critical SLAs (for Webscale Stratus Lite plan and above).

Optional Add-ons

Webscale CloudEDGE products can be subscribed as an add-on by storefronts hosted with Webscale Stratus for boosting performance and/or an extra layer of security.

Webscale CloudEDGE CDN

Webscale CloudEDGE CDN is the world's first cloud-agnostic, compute-at-the-edge CDN designed for boosting the performance and security of ecommerce storefronts. With real-time code execution at the edge, CloudEDGE CDN provides control over the entire application infrastructure, coupled with computing capabilities that enable a wide range of use cases and analytics to deliver robust DDoS protection, dynamic image optimization, and Core Web Vitals improvements up to 30 points.

Webscale CloudEDGE Security

Webscale CloudEDGE Security is the most complete security platform for ecommerce, deployed at the traffic edge, alongside or as a replacement for traditional CDNs and WAFs. CloudEDGE Security sits in any cloud, on top of Magento, and uses automation and analytics to proactively identify and protect web applications from card testing attacks, bad bots, and malicious server-side injections.

Webscale, CloudEDGE and Webscale Stratus are Webscale Networks, Inc. brands.
